8. MANAGEMENT DISCUSSION & ANALYSIS :

Over the years, your Company has largely been investing in listed equity, with a disciplined approach to investing for the long term. In the last few years, the Company has augmented this philosophy by investing larger and larger sums to leaders in sectors, which the Company expects to hold for a long period. It will be the endeavour of the Company to concentrate larger sums to such investments which the Company believes has a potential to remain value accretive over the long term.

The Company has shared with the shareholders that the Company will reduce its dependency on realized gains and endeavour to maintain distributable earnings, thereby allowing the investments to accrue gains over a longer term. In the last three years, the Company has distributed more than 60% of the distributable profits earned. This strategy, supported by a vibrant equity market, has resulted in a significant outperformance of the listed portfolio during the current year.

The management has endeavoured to bring out the performance of the Company's portfolio over the last 15 years using what we have called the "Value Created" measure. Value Created is a measure which evaluates the wealth created net of the capital invested by the shareholders. "Value Created" is the Realisable Value of Investments as on 31st March (each year) to which is added Current and Fixed assets while any contribution from shareholders and outstanding liabilities and provisions are reduced.

The following table shows the Value Created over the 15 year period and comparative returns to the Benchmark.

Year End (31st March)	Realisable Value of Investments (A) (₹ crs)	Net Current Assets (B) (₹ crs)	Paidup Capital (C) (₹ crs)	Share Premium (D) (₹ crs)	Value Created (A)+ (B)-(C)-(D) (₹ crs)	BSE 200
FY2000*	721.70	-4.19	16.41	42.03	659.07	623.19
FY2005	1,490.05	-23.64	22.97	57.34	1,386.10	867.58
FY2010	3,638.07	224.25	48.24	478.58	3,335.50	2,199.50
FY2015	7,072.52	-82.40	55.10	748.79	6,186.23	3,531.55
				Appreciation Multiplier (X)	9.39	5.67
				CAGR %	16.03	12.26

*The Company had for the first time declared a realisable value of its unquoted investments in 2008. The realisable value of investments as on 31st March, 2000 includes unquoted equity investments valued at cost (₹ 67.95 crores)

The shareholders will be pleased to note that the 'Value Created' in the Company's portfolio has multiplied 9.39 times over the last 15 years viz-a-viz a 5.67 times increase in the value of BSE 200 over the same period.

The BSE 200 not being a Total Return Index excludes the impact of accrual of dividend income, declared by its constituent companies. In the case of our Company, the impact of dividend declared by the company, provided annually and reflected in the value of Net Current Assets, being higher than the dividend earned by the company results in a negative impact to the "Value Created" at the end of the year. Thus, over the last fifteen years the differential between the CAGR of the Company's portfolio vis-à-vis the CAGR of the BSE 200 Index would have been higher if compared on an apple to apple basis.

On account of the rights issue of convertible bonds and warrants the equity and share premium increased from ₹89.34 crores as on 31st March, 2008 to ₹782 crores as on 31st March, 2012. Shareholders will be pleased to note that for the portfolio as a whole, post the increase in the equity and share premium, the "Value Created" has recorded a CAGR in appreciation of 21.25% vis-à-vis the BSE 200 which has recorded a CAGR of 17.90% in appreciation for the three year period 31st March, 2012 to 31st March, 2015. It is heartening that this performance has been achieved while the management of the Company has endeavoured to reduce risk of the portfolio with a prudent allocation to unlisted equity and fixed income securities.

Global Equity Markets

Global equity markets continue to remain buoyant in the sixth year of recovery after the collapse in 2009 and investors are enjoying one of the longest bull markets since the 1940's. Globally two indices have recorded the highest outperformance, Standard & Poor's 500 index and the BSE 200 which have more than tripled since bottoming out in March 2009. The markets have appreciated through a debt crisis in the US and Europe, escalating conflicts in the Middle East, renewed tensions with Russia over Ukraine and Europe's stagnating economy.

Most market strategists believe that the markets are expensively valued and have run up ahead of fundamentals but do not exhibit signs that typically accompany a market peak. Investors remain circumspect and haven't become rash. Companies with stressed balance sheets enjoying valuation bubbles are yet not visible in the listed market in India. In the US and in India there is a fear that some of the e-commerce and social media stocks have reached excessive valuations.

In the US there have been 12 bull markets since the end of World War II, with the average run lasting 58 months, according to S&P Capital IQ. At 72 months, the current streak is the fourth longest in that period with the longest having stretched 113 months into circa 2000. The U.S. economy continues to strengthen and inflation remains tame. While the Fed has ended its bond-buying programme, other global central banks, like the European Central Bank and the Bank of Japan have initiated providing stimulus to their economies.

India has emerged as an investment case quite separate from the other BRIC nations and other emerging markets, as a consequence of the fall in global commodities especially oil. The sudden fall in the price of oil by almost 50% has created unpredictable stress in the development of some of the commodity exporters including middle-east countries, countries in South America and Russia. Fall in global commodities has improved India's macro economy landscape through lower imported inflation, lower trade deficit and lower fiscal deficit facilitating the central bank to lower interest rates.

Global investors have found tremendous comfort and confidence in the government's development vision. The government has embarked upon endeavours which are expected to stimulate growth in the capex cycle and in the economy in the years to come. General consensus prevails that Railways and Road construction are areas which could see visible development in FY1516. The finance budget has increased capital outlays in both these sectors.

(₹ crores)

Budget Allocations	2013-14	2014-15 (RE)	2015-16 (BE)
Central Plan Expenditure			
Ministry of Railways	27,072	30,100	40,000
Road Transport and Highways	20,722	25,114	40,002

** Source: Economic Survey 2014-15

While incremental development will result in higher growth, the acute situation of stalled projects has been detrimental to corporate sector investment. Resurgence in confidence of companies to invest for the next capex cycle will be visible once capital invested by entities in stalled projects begins to earn a fair return.

To quote the Economic survey, "the accumulated stock of stalled projects at the end of December 2014 stood at ₹8.8 lac crore [₹1.8 lac cr (public) + ₹7 lac cr (private)], which has reached a staggering 8-9% of GDP over the last three fiscal years and have been a leading reason behind the decline in Gross Fixed Capital Formation (GFCF). From a peak of 24% (yoy) in last quarter of 2009-10, the rate of growth of GFCF now languishes around zero." It goes on to say that clearing the top 100 stalled projects will address 83 per cent of the problem of stalled projects by value. Off late there has been some revival in projects in Q1 and Q2 FY14 and may have reached a low in Q4FY13.

** Source: Economic Survey 2014-15

It is understood that stalled projects are severely affecting the balance sheets of the corporate sector and public sector banks, which in turn is constraining future private investment, completing a vicious circle, characterised by an investment slowdown leading to lower credit growth due to weak investment.

** Source: Economic Survey 2014-15

During the year, the markets will find that indicators of revival may become visible towards the second and third quarter of the financial year. If the aforesaid areas of concern do not find themselves being addressed then perhaps the markets may have to reconcile to discounting earnings lower than envisaged by investors at the close of FY1415.

Over the last year, equity market participants have reconciled to the fact that the year FY1516 may not see the economic revival which was visualised a few months ago. The expectation has now moved to a more robust growth in FY1617 which could very well be the case. If all goes well, next year industry and trade will move onto the new era of Goods & Services Tax (GST). There may be some hiccups and a period of adjustment but manufacturers and distributors are looking forward to GST being implemented. The benefits of GST will flow into the economy a year or two later once distribution linkages have stabilized with the tax reform.

Your Company's portfolio is concentrated in high quality companies with minimal balance sheet risk and in sectors which have consistent growth namely Banks & Finance companies (ICICI, Axis, IDFC); FMCG companies (Titan, ITC,

Nestle); or which enjoy natural competitive advantage namely, Pharma (Sun Pharma, Glenmark, Cadilla), IT (TCS, Infosys, Tech Mahindra) and Engineering (L&T, BEL, BEML). In the power sector we have investments in leaders namely NTPC, Powergrid and Tata Power. In Auto our large investments are in Tata Motors and Maruti Suzuki. In this downturn we have started investing in Hero MotoCorp and Bajaj Auto.

Keeping with its policy to augment the potential for appreciation, the Company continues to invest for the long term while availing opportunities to realize gains in periods of exuberance in the markets. The Company continues to invest in Tata and Non-Tata companies, both in the listed and unlisted categories; though investments in Tata companies constitute a larger portion and are of a longer term and strategic nature.

Income tax expense comprises current tax and deferred tax charge or credit. The current tax is determined as the amount of tax payable in respect of the estimated taxable income for the period. The deferred tax charge or credit is recognised using prevailing enacted or substantively enacted tax rates. Where there is unabsorbed depreciation or carry forward losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence of realisation of such assets. Other deferred tax assets are recognised only to the extent there is a reasonable certainty of realisation in future. Deferred tax assets / liabilities are reviewed at each Balance Sheet date, based on developments during the year and available case laws to reassess realisation / liabilities. Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

1.8 Cash and cash equivalents (for purposes of Cash Flow Statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

1.9 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

1.10 Accounting for provisions, contingent liabilities and contingent assets

In accordance with AS-29, Provisions, Contingent Liabilities and Contingent Assets, the Company recognises provisions when it has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and when a reliable estimate of the amount of the obligation can be made.

Provisions are determined based on management estimate required to settle the obligation at the balance sheet date, supplemented by experience of similar transactions. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

A disclosure of contingent liability is made when there is:

- a possible obligation arising from a past event, the existence of which will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not within the control of the Company; or

- a present obligation arising from a past event which is not recognised as it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent Assets, if any, are not recognised in the financial statements since this may result in the recognition of income that may never be realized.

1.11 Onerous contracts

Provisions for onerous contracts are recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

1.12 Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. Impairment loss, if any, is provided in the Statement of Profit and Loss to the extent the carrying amount of assets exceeds their estimated recoverable amount.

1.13 Operating Cycle

Based on the nature of activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

Note:

2.7.1 The Company has revised its policy of providing depreciation / amortisation on fixed assets effective 1st April, 2014. Depreciation is now provided on a straight line method as against written down value method and the remaining useful life has also been revised in line with Schedule II of the Companies Act, 2013 wherever appropriate based on management's internal evaluation. The company believes that the change in the method leads to more appropriate presentation of the financial statements.

The depreciation expense in the Statement of Profit and Loss for the year is lower by ₹16.74 lacs consequent to the above change in the method of depreciation and change in the useful life of the assets.

On account of these changes depreciation / amortization expenses for the year and net block of fixed assets as on 31st March, 2015 are not comparable with previous years.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2015

1. Basis of Consolidation and Significant Accounting Policies:

1.1 Basis of Consolidation

The Consolidated Financial Statements relate to Tata Investment Corporation Limited (the Company), its Subsidiary and its Associates.

a. Basis of Preparation

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("the 2013 Act") / Companies Act, 1956 ("the 1956 Act"), and the applicable guidelines issued by the Reserve Bank of India ("RBI"). The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year except for change in the accounting policy for depreciation as more described in Note 2.7.1.

b. Use of Estimates

The preparation of the financial statements requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including the contingent liabilities) and the reported income and expenses during the reporting period. The Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. The differences between the actual results and the estimates are recognised in the period in which the results are known / materialise.

c. Principles of Consolidation

The Consolidated Financial Statements of the Company have been prepared on the following basis:

- i. The financial statements of the Company and its subsidiary company have been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses. The intra group balances and intra group transactions and unrealised profits have been fully eliminated as per Accounting Standard 21- 'Consolidated Financial Statements' notified of the Companies Act, 2013.
- ii. The Consolidated Financial Statements include the share of profits of the Associate companies which have been accounted as per the 'Equity method', and accordingly, the share of profit of each of the Associate companies has been added to the cost of investments.

An Associate is an enterprise in which the Company has significant influence and which is neither a Subsidiary nor a Joint Venture of the Company
- iii. The excess of cost to the Company of its investments in the subsidiary company over its share of equity of the Subsidiary company at the dates on which the investments in the Subsidiary company are made, is recognised as 'Goodwill' being an asset in the Consolidated Financial statements.
- iv. Minority Interest in the net assets of consolidated subsidiary is identified and presented in the Consolidated Financial Statements separately from liabilities and equity of the Company's shareholders.

1.3 Revenue recognition

- a) Income from dividend is accounted when such dividend has been declared and the Company's right to receive payment is established.
- b) Interest income is recognised on a time proportionate basis, taking into account the amount outstanding and the coupon rate applicable. Income from debentures and bonds is accrued over the maturity of the security, net of amortisation of premium / discount, where intended to be held for a long term, with reference to the coupon dates.
- c) In accordance with Guidance Note on "Accounting for Equity Index and Equity Stock Futures and Options" issued by The Institute of Chartered Accountants of India.

Equity Index / Stock Futures:

1. Equity Index / Stock Futures are marked-to-market on a daily basis. Debit or credit balances, if any, are disclosed under Loans and Advances or Current Liabilities respectively. The "Mark-to-Market Margin Equity Index / Stock Futures Account", represents the net amount paid or received on the basis of movement in the prices of Equity Index / Stock Futures till the Balance Sheet date.
2. As at the Balance Sheet date, the profit/ loss on open positions, if any, in Equity Index / Stock Futures are accounted for as follows: - Credit balance in the "Mark-to-Market Margin - Equity Index / Stock Futures Account", being anticipated profit, is ignored and no credit is taken in the Statement of Profit and Loss. - Debit balance in the "Mark-to-Market Margin - Equity Index / Stock Futures Account", being anticipated loss, is recognised in the Statement of Profit and Loss.
3. On final settlement or squaring-up of contracts for Equity Index / Stock Futures, the profit or loss is calculated as the difference between settlement / squaring-up price and contract price. Accordingly, debit or credit balance pertaining to the settled / squared-up contract in "Mark-to-Market Margin - Equity Index / Stock Futures Account" is recognised in the Statement of Profit and Loss upon expiry of the contracts. When more than one contract in respect of the relevant series of Equity Index / Stock Futures contract to which the squared-up contract pertains is outstanding at the time of the squaring up of the contract, the contract price of the contract so squared up is determined using First In First Out Method for calculating profit / loss on squaring-up.
4. "Initial Margin - Equity Index / Stock Futures Account", representing the initial margin and "F&O Margin Money Deposit" representing additional margin paid over and above the initial margin, for entering into contracts for Equity Index / Stock Futures, which are released on final settlement / squaring-up of underlying contracts, are disclosed under Loans and Advances.

In accordance with Guidance Note on "Accounting for Equity Index and Equity Stock Futures and Options" issued by The Institute of Chartered Accountants of India.

Equity Index / Stock Options :

1. Equity Index / Stock Option Premium Account represents the premium paid for buying or selling the options, respectively.
2. As at the Balance Sheet date, in the case of long positions, provision is made for the amount by which the premium paid for those options exceeds the premium prevailing on the balance sheet date, and in the case of short positions, for the

amount by which the premium prevailing on the balance sheet date exceeds the premium received for those options, and is reflected in Provision for Loss on Equity Index / Stock Option Account.

3. When the option contracts are squared-up before the expiry of the options, the premium prevailing on that date is recognized in the profited loss account. If more than one option contract in respect of the same index / stock with the same strike price and expiry date to which the squared-up contract pertains is outstanding at time of squaring-up of the contract, the weighted average method is followed for determining the profit or loss.
4. On the expiry of the contracts and on exercising the options, the difference between the final settlement price and the strike price is transferred to the profit & loss account.
5. In both the above cases, the premium paid or received from buying or selling the option, as the case may be, is recognized in the profited loss account for all squared-up / settled contracts.
6. "Initial Margin - Equity Index / Stock Futures Account", representing the initial margin and "F&O Margin Money Deposit " representing additional margin paid over and above the initial margin, for entering into contracts for Equity Index / Stock Option, which are released on final settlement / squaring-up of underlying contracts, are disclosed under Loans and Advances.

1.4 Employee benefits

- a) Short-term employee benefits are recognised as an expense at the undiscounted amount in the Statement of Profit and Loss of the period in which the related service is rendered.
- b) Contributions under Defined Contribution Plans i.e. provident fund & superannuation fund are recognised in the Statement of Profit and Loss in the period in which the employee has rendered the service.
- c) Company's liability towards Defined Benefit Plans / Long term compensated absences is determined by an independent actuary using the projected unit credit method. Past service cost is recognised on a straight line basis over the average period until the benefits become vested. Actuarial gains and losses are recognised immediately in the Statement of Profit and Loss as income or expense. Obligation is measured at the present value of estimated future cash flows using a discount rate that is determined by reference to the market yields at the Balance Sheet date on Government Bonds where the currency and terms of the Government Bonds are consistent with the currency and estimated terms of the defined benefit obligation.

1.5 Investments

- a) Long Term investments are accounted for and valued as per Accounting Standard (AS) 13 - 'Accounting for Investments' are stated at average cost except where there is a diminution other than temporary, for which provision is made.
- b) Current investments are accounted for and valued as per Accounting Standard (AS) 13 - 'Accounting for Investments' and in accordance with the RBI guidelines, are stated at the lower of cost and fair value, by category of investments.
- c) The difference between the holding cost and the face value of the Government securities / Bonds / Debentures is written off / up proportionately over the remaining life of the concerned investment or, till the call option date in case of perpetual debentures.
- d) Inter-class transfer of investments from one category to the other, if any, is done in accordance with the RBI guidelines at the lower of book value and fair value / market value on the date of transfer.

1.6 Taxes on income

Income tax expense comprises current tax and deferred tax charge or credit. The current tax is determined as the amount of tax payable in respect of the estimated taxable income for the period. The deferred tax charge or credit is recognised using prevailing enacted or substantively enacted tax rates. Where there is unabsorbed depreciation or carry forward losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence of realisation of such assets. Other deferred tax assets are recognised only to the extent there is a reasonable certainty of realisation in future. Deferred tax assets / liabilities are reviewed at each Balance Sheet date, based on developments during the year and available case laws to reassess realisation / liabilities. Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

1.7 Cash and cash equivalents (for purposes of Cash Flow Statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

1.8 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

1.9 Accounting for provisions, contingent liabilities and contingent assets

In accordance with AS-29, Provisions, Contingent Liabilities and Contingent Assets, the Company recognises provisions when it has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and when a reliable estimate of the amount of the obligation can be made.

Provisions are determined based on management estimate required to settle the obligation at the balance sheet date, supplemented by experience of similar transactions. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

A disclosure of contingent liability is made when there is:

- a possible obligation arising from a past event, the existence of which will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not within the control of the Company; or

- a present obligation arising from a past event which is not recognised as it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent Assets, if any, are not recognised in the financial statements since this may result in the recognition of income that may never be realized.

1.10 Onerous contracts

Provisions for onerous contracts are recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

1.11 Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. Impairment loss, if any, is provided in the Statement of Profit and Loss to the extent the carrying amount of assets exceeds their estimated recoverable amount.

1.12 Operating Cycle

Based on the nature of activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

1.13 Goodwill on Consolidation

Goodwill arising out of consolidation of financial statements of Subsidiaries and Associates is not amortised. However the same is tested for impairment at each Balance Sheet date.
